POPstore IKS - Interactive Kiosk

OVERVIEW

POPstore™ IKS is an interactive kiosk specifically designed for new generation point-of-service applications. It offers added convenience of quick and easy access to interactive content and real-time info in out-of-home. Online merchants can leverage on POPstore IKS to establish fast time-to-market presence in locations where they have no physical presence.

Designed with ergonomics and functionality in mind, POPstore IKS features a super-slim design ideally fit for applications where space is a premium. For retail storefronts who plan to extend presence and increase visibility, POPstore IKS is a cost-effective means as an alternative channel to reach target customers through self-service interaction.

FEATURES
