

# SenPass CP – Copy/Print Controller

## OVERVIEW

SenPass™ CP is the world's first Authenticated Printing & Copying Control System integrating the contactless smart card and print/copy replication technologies to support secured authentication, remote printing, pre-paid and post-paid charging. Its intelligent controller is also able to directly interface with printers or photocopiers, capture the usage and transaction data, and enable data upload through wired or wireless network connection.

SenPass™ CP is versatile for facilities monitoring and usage accounting applications in printing/copying for both office administration and public services. It is particularly appealing to printing/copying service control in venues like school computer lab, hotel business centre, airport WLAN hotspot and membership clubhouse. The contactless smart card plays both as an “access pass” as well as an “electronic wallet” for user authentication and service payment. The whole operation can be implemented unmanned without incurring additional administrative work.

## FEATURES

- Fully automated system for authenticated printing/copying services in public
- Supports one card for multiple applications in facilities usage monitoring
- Integrates with virtually all famous brands of printers or photocopiers
- Enables “shared” network printer with secured “private mode” printing control
- Supports both pre-paid and post-paid charging mechanisms

## BENEFITS

- Provides a secured and controlled platform for printing/copying service control
- Simplifies accounting & payment using smart card as coins or electronic tokens
- Reduces the wastage of resources for high quality color printing/copying
- Enables secured “on-demand” printing for remote printing using shared printer
- Automatic fee collection for public printing/copying service bureaus

## APPLICATIONS

- Office Administration – Departmental Printing/Copying Cost Allocation
- School Computer Lab – Shared Printing Service Accounting
- Hotel Business Center – 24 Hours Automated Printing/Copying Service
- Airport WLAN Hotspot – Value-Added Print Service to Wireless LAN Access
- Membership Clubhouse – Chargeable Printing/Copying Service
